1. Introduction

iCap is the most powerful video capture software with low hardware requirement. You can use USB web cam and notebook computer to record your English, Chinese or Putonghua oral lesson into a wmv or mp4 format.

2. Hardware and Software Requirement

Minimum hardware requirement

CPU	Intel Celeron(R) 2.0G
RAM	256 RAM
CAM	USB Web Cam (Recommended Video Capture Device: SN9C201/SN9C202) Video Camera is also support but video capture card is required to add to computer.
Microphone	Built-in Microphone (Recommended Microphone: Super Cardioid Electret Condenser Microphone Model: EM02800)

3. Installation

Go to the following web site to download the installer.

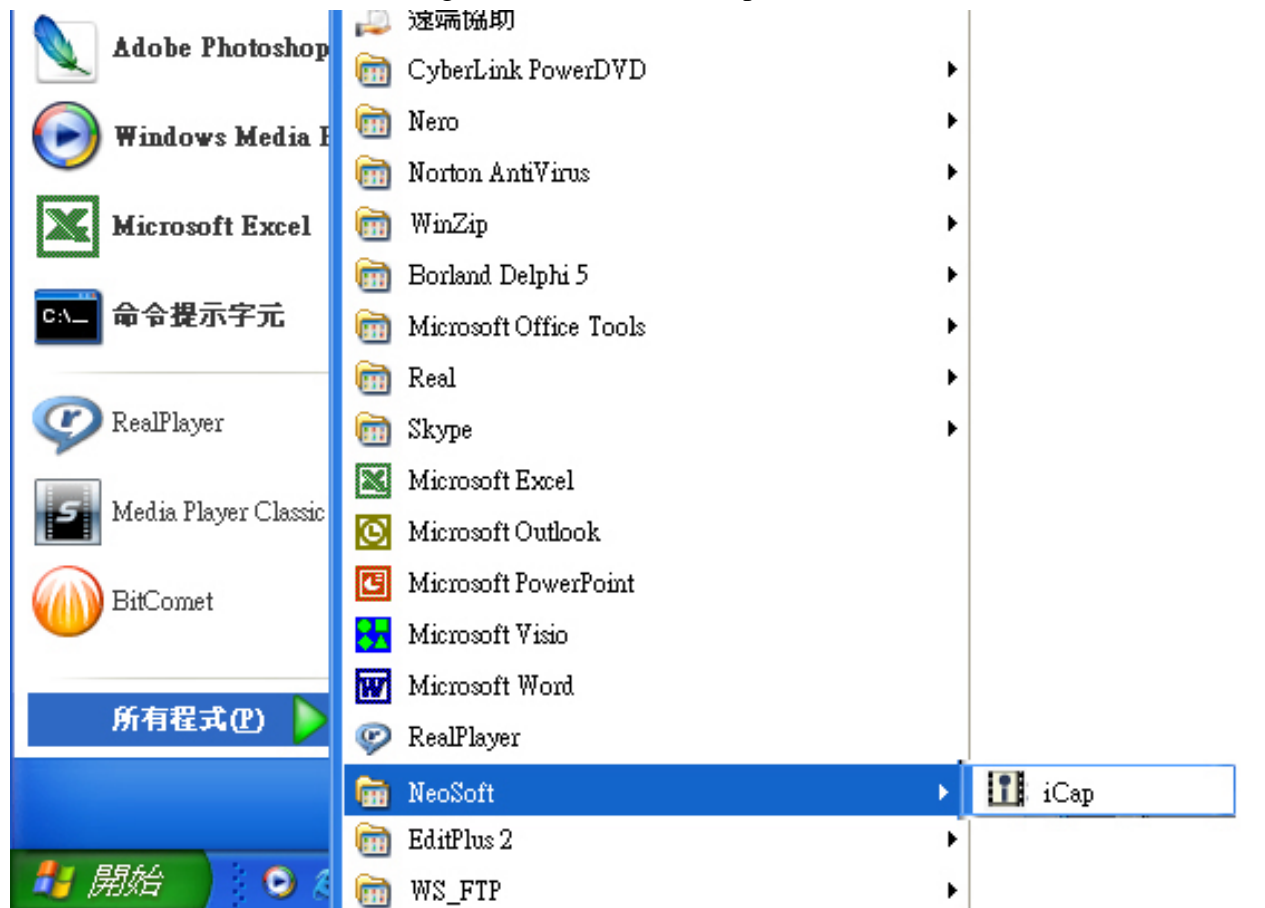

<http://icap.neo-soft.net/download.html>

Execute the following file named with iCap.exe

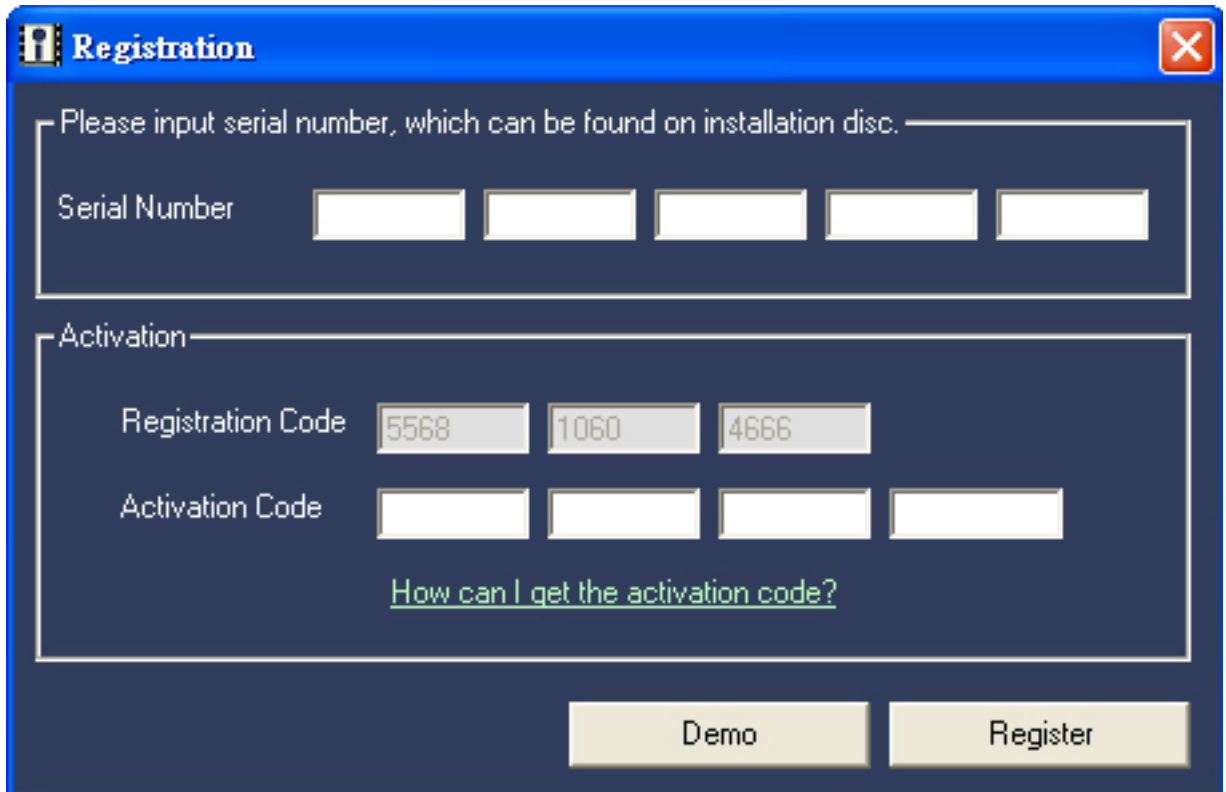

Please follow the instruction of the installer program.

Then at “Start” Menu, select “Program Files\NeoSoft\iCap.exe” as follow:

The following menu will be appeared.

The image shows a 'Registration' dialog box with a blue title bar and a close button. The main area is dark blue with white text and input fields. It contains a prompt for a serial number, five input boxes for the serial number, a section for activation codes with three boxes containing '5568', '1060', and '4666', and four empty boxes for an activation code. A link 'How can I get the activation code?' is present. At the bottom are 'Demo' and 'Register' buttons.

Registration

Please input serial number, which can be found on installation disc.

Activation Code

[How can I get the activation code?](#)

Demo Register

You should have a Serial Number which is printed on the iCap Installation CD or provided by our sales representative.

Go to the following web site.

<http://icap.neo-soft.net/registration.html/>

The following web page will be shown:

Fill in your serial number and registration code then click Submit, an Activation Key will be generated.

Please be noted that the registration code is generated by getting hardware information from your computer. Each serial number is allowed for one computer only. If you want to install into another computer after you have successfully registered, you need to contact us for generating another activation code.

Go back to program menu and fill in all necessary information. For successful registration, the following screen will be appeared.

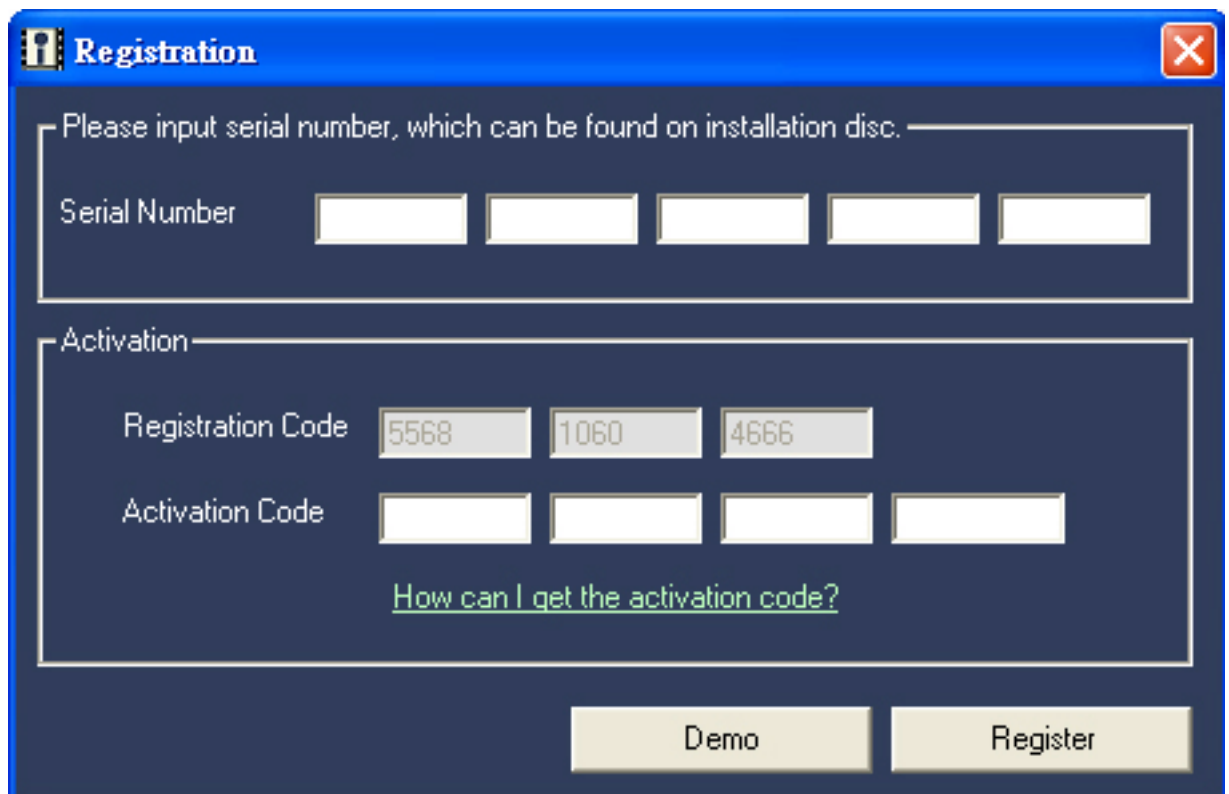

4. Capture Video

Before you start to capture video, remember to connect both the USB Web Cam and Microphone into your PC.

Then go to program menu to start iCap.

4.1 Demo Version

You can trial the software before you decided to buy. Click the “Demo” button and start capture.

The image shows a registration dialog box titled "Registration" with a close button in the top right corner. The dialog contains the following elements:

- A text prompt: "Please input serial number, which can be found on installation disc."
- A "Serial Number" label followed by five empty text input boxes.
- An "Activation" label followed by two rows of input boxes:
 - "Registration Code" with three boxes containing the numbers "5568", "1060", and "4666".
 - "Activation Code" with four empty text input boxes.
- A green underlined link: [How can I get the activation code?](#)
- Two buttons at the bottom: "Demo" and "Register".

NeoSoft Software Multimedia Engineers

For Demo version, only 30 seconds recording is allowed, you can enter teacher name, and at most 4 students name. A watermark will be automatically printed on video. Please noted that there is a count down time showing on the stop button, capture will be stopped automatically after 30 seconds.

You can selected the video in the bottom box to view the play back.

Click the following button to stop video. You should stop play back before you want to capture another video

Click the following button to pause.

Click the following button to view play back in fullscreen. Double click the fullscreen play back in order to resume normal.

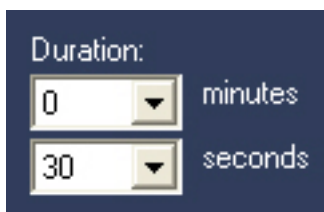

4.2 Registered Version

For registered version, there is no time limit to video capture and there is no water mark during capturing. The only limitation of the size of the video is the size of your hard disk.

User can change the capture duration by changing the time setting of the duration time box.

You can selected the video in the bottom box to view the play back.

Click the following button to stop video. You should stop play back before you want to capture another video

Click the following button to pause.

Click the following button to view play back in fullscreen. Double click the fullscreen play back in order to resume normal.

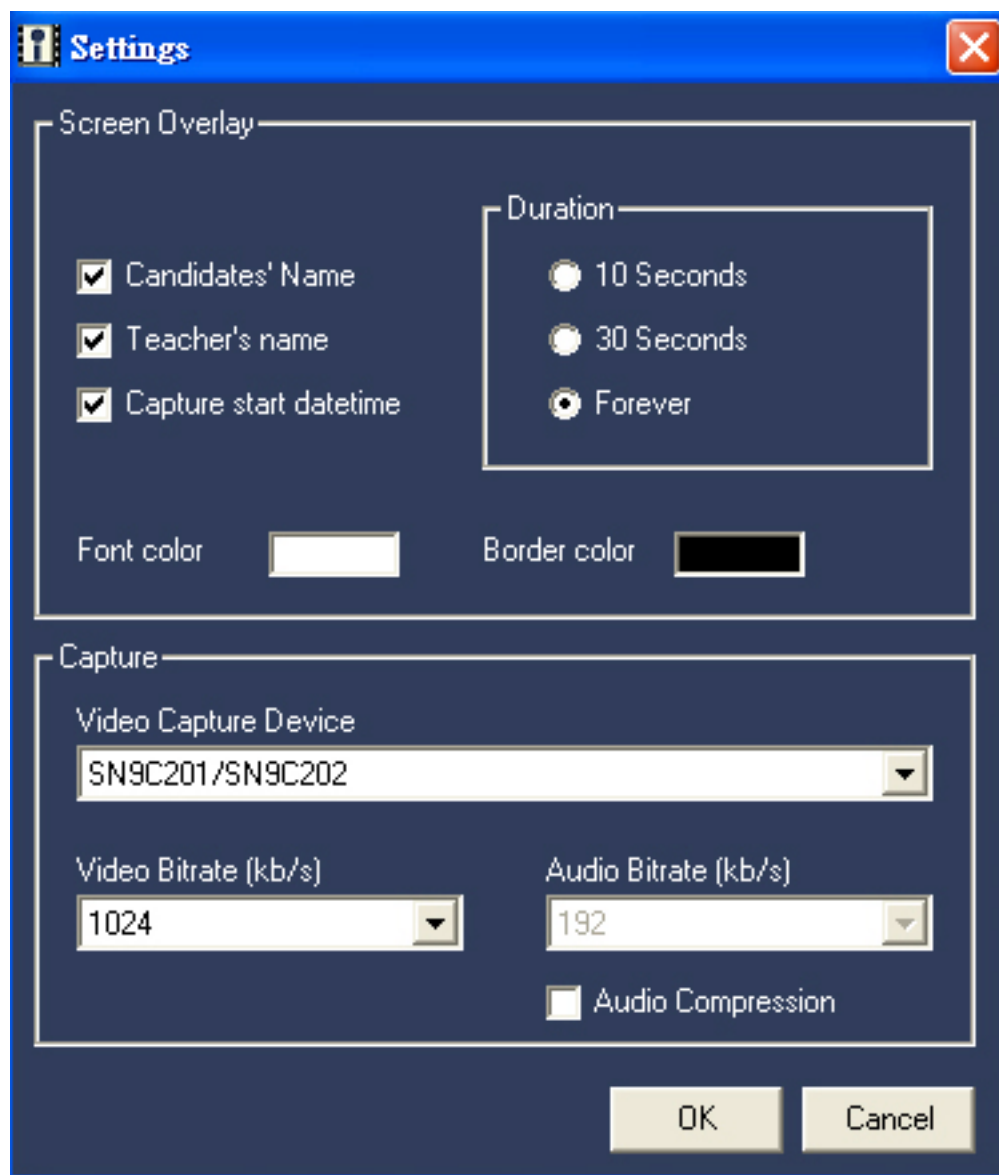

5. Advance Setting

. Click the following button for advance setting

The setting panel will be appeared.

The first box is the overlay setting. Overlay refer to those items render on the video. You can enable/disable teacher name and students name.

You can choose overlay duration of text item. 10 seconds, 20 seconds or forever.

You can change the font color and the border size. By default it is font color is white and border is black.

The second box is the capture setting.

You can choose the capture device.

You can change the audio and video bit rate. For faster pc, means note book CPU faster than Pentium 1.7 you can use 1024 for video bit rate and 192 for audio bit rate. You can lowered the video and audio bit rate and test the result. Lower bit rate means lower quality of video.

For Audio Compression. If you are using very slow computer, it is recommended not to check audio compression check box. By not clicking the check box there will be no audio compression, although the file size will be larger but it can support low speed cpu.

6. Export and Burn CD

Select a captured video and then right click your mouse button
